

Abduction Cushion

Ergonomic design

Well-considered design combines wearer comfort and effective performance.

Environment

We take into account the patient as well as the environment.

Comfort

The quality of our products shows itself in the level of comfort experienced.

GeniMedical's abduction cushion was designed in such a way as to stabilise the shoulder in a fixated abduction position. Since the arm is inside the cushion, the shoulder will not be able to rotate. The cushion is made of material which is soft and therefore pleasant to wear for the patient.

Available in the following sizes:

Right	Left	Article description	Size
