

ACL-PCL and MCL-LCL Instability Brace

(previously New Edge Knee Brace)

Ergonomic design

Well-considered design combines wearer comfort and effective performance.

Environment

We take into account the patient as well as the environment.

Comfort

The quality of our products shows itself in the level of comfort experienced.

The ACL-PCL and MCL-LCL Instability Brace has an excellent fit and is made from the unique AirGenix® antibacterial fabric, which offers a significant advantage in postoperative and post-traumatic care by reducing the risk of wound infections and helping to prevent unpleasant odors. The flexion and extension of this ROM brace are fully adjustable.

Indications:

- ACL - PCL fracture and/or reconstruction; post-surgery LC treatment
- Knee traumas (distortions or dislocations), joint laxity, lateral instability
- Support in case of light or medium gonarthrosis
- During rehab phase, to provide a support and improve confidence
